

Md Tahseen Alam

Full Stack Engineer

Jaipur, Rajasthan | +91-9117391745 | tassutahsee@gmail.com | Portfolio | GitHub | LinkedIn | LeetCode

Summary

Full stack developer skilled in React.js, Next.js, Node.js, and MongoDB, with hands-on experience taking applications from database design through deployment on AWS/Vercel. Shipped multiple full-stack platforms, including a multi-school system tested across 4 school organizations with 35+ role-based demo accounts. Solved 300+ DSA problems on LeetCode.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++

Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML5

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Socket.IO, Redis, BullMQ

Databases: MongoDB, Mongoose, PostgreSQL, Database Design, Schema Design

DevOps & Cloud: Docker, Git, GitHub, CI/CD, AWS (EC2, S3, CloudFront), Vercel, Render

AI & Integrations: OpenRouter API, Google OAuth, NextAuth, Cloudinary, Multer, Postman

Experience

Full Stack Developer Intern

Texura (Remote)

Oct 2025 – Jan 2026

MERN Stack, REST APIs, JWT, Cloudinary

- Independently built a restaurant management platform covering table booking, online ordering, menu management, and administration, structured around 3 distinct user roles with role-specific workflows and access boundaries.
- Built and integrated 15+ RESTful APIs covering authentication, restaurants, menus, tables, bookings, and orders, with role-based access control protecting resources across the application.
- Integrated payment and media workflows end to end, connecting Razorpay test-mode payments and Cloudinary-based image storage from user interaction through backend processing.

Cloud & DevOps Intern

Learn & Build (Remote)

Aug 2023 – Sep 2023

Docker, Git, CI/CD, AWS

- Containerized backend services with Docker to standardize environments and make deployments reproducible across development and production.
- Established Git branching and pull request workflows to organize collaborative development and maintain consistent version control.
- Built CI/CD pipelines connecting source changes to automated deployments through AWS EC2 and S3, monitoring applications post-deployment.

Projects

EduManage | GitHub

React, Node.js, Express.js, MongoDB, Socket.IO, OpenRouter

- Architected a multi-school platform with 5 role-specific dashboards (Super Admin, School Admin, Teacher, Student, Parent) enforcing school-level data isolation, tested across 4 school organizations and 35+ role-based demo accounts.
- Structured the backend around modular REST APIs and 10+ MongoDB data models covering attendance, exams, timetables, homework, grades, and messaging.
- Built a request-authorization pipeline combining JWT authentication, bcrypt hashing, role-based middleware, and school-context validation on every protected route.
- Integrated an AI tutor via OpenRouter with configurable/fallback models and persisted conversation history; added Socket.IO for real-time messaging, then deployed the backend on AWS EC2 with the frontend on Vercel.

MockMate | GitHub

React, Node.js, Express.js, MongoDB, BullMQ, Redis, OpenRouter

- Built an AI mock interview platform where an LLM asks resume-grounded questions by role and experience level, streaming replies over Server-Sent Events and auto-completing the interview after 8 questions.
- Split the backend into separate API and report-worker services on Render, using MongoDB and Redis to handle interview data and background report generation independently.
- Offloaded report generation to a BullMQ job queue with automatic retries (3 attempts, exponential backoff); secured the platform with JWT auth and server-side PDF parsing (Multer + pdf-parse) to ground questions in the candidate's resume.
- Generated structured interview reports from the full transcript, including an overall score, category breakdown, strengths, weaknesses, and suggestions.

Achievements

- Solved 300+ Data Structures and Algorithms problems across LeetCode and other coding platforms.
- Branch Topper in Diploma in Computer Science Engineering (82.17%).

Education

B.Tech in Computer Science & Engineering

Global Institute of Technology, Jaipur

2022 – 2026

Diploma in Computer Science Engineering — 82.17%

Jamia Polytechnic, Akkalkuwa

2019 – 2022
