

Md Tahseen Alam

Full Stack Developer

Jaipur, Rajasthan | +91-9117391745 | tassutahsee@gmail.com | Portfolio | GitHub | LinkedIn | LeetCode

Summary

Full Stack Developer experienced in building and shipping end-to-end web applications using React, Next.js, Node.js, and MongoDB. Built multi-role platforms with authentication, REST APIs, real-time communication, AI integrations, and cloud deployment, with hands-on ownership from application design and database modeling through deployment.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++

Frontend: React.js, Next.js, Redux, Tailwind CSS, HTML5

Backend: Node.js, Express.js, REST APIs, JWT, RBAC, Socket.IO

Databases: MongoDB, Mongoose, PostgreSQL, Database Design

Cloud & Deployment: AWS EC2, Docker, Git, GitHub, Vercel, Render

AI & Integrations: OpenRouter API, NextAuth, Google OAuth, Cloudinary, Multer, Redis, BullMQ

Experience

Full Stack Developer Intern | *Texura (Remote)*

Oct 2025 – Jan 2026

MERN Stack, REST APIs, JWT, Cloudinary

- Independently built a restaurant management platform from scratch with table availability, booking, online ordering, menu management, and role-specific administration workflows.
- Developed 15+ REST APIs for authentication, restaurants, menus, tables, bookings, and orders, enforcing role-based access across application resources.
- Integrated Razorpay test-mode payments and Cloudinary image storage, connecting frontend user flows with backend payment and media-processing workflows.

Cloud & DevOps Intern | *Learn & Build (Remote)*

Aug 2023 – Sep 2023

Docker, Git, CI/CD, AWS

- Containerized backend services with Docker to standardize local development and deployment environments.
- Worked with Git branching and pull request workflows to organize collaborative development and maintain version-controlled codebases.
- Gained hands-on experience with CI/CD and AWS deployment workflows using EC2 and S3.

Projects

EduManage | GitHub

React, Node.js, Express.js, MongoDB, Socket.IO, OpenRouter

- Built a full-stack multi-school management platform with 5 role-specific dashboards supporting administration, academics, communication, analytics, and AI-assisted learning; tested across 4 schools with 35+ role-based demo accounts.
- Developed REST APIs and 10+ MongoDB data models for attendance, classrooms, exams, timetables, homework, grades, submissions, and messaging.
- Implemented JWT authentication, bcrypt password hashing, role-based access control, and school-context validation to protect resources across Super Admin, School Admin, Teacher, Student, and Parent roles.
- Added Socket.IO communication, Cloudinary file uploads, and an AI tutor with persisted conversation history; deployed the Express backend on AWS EC2 and frontend on Vercel.

Lexica | GitHub

Next.js, TypeScript, MongoDB, NextAuth, OpenRouter, Tailwind CSS

- Built a full-stack AI document generation platform using Next.js and TypeScript, supporting Business Pitches, Market Analysis, Academic Synopses, Lesson Plans, and Freelance Proposals.
- Implemented Google OAuth authentication with NextAuth and integrated MongoDB/Mongoose for server-side data and authentication workflows.
- Built server-side AI generation through Next.js API routes using OpenRouter, separating AI logic from UI components and generating structured reports from user prompts.
- Developed reusable report-generation and viewing workflows with responsive React components, enabling users to review generated content and export reports as PDF or DOCX.

Achievements

- Solved 300+ Data Structures and Algorithms problems across LeetCode and other coding platforms.
- Branch Topper in Diploma in Computer Science Engineering (82.17%).

Education

B.Tech in Computer Science & Engineering | *Global Institute of Technology, Jaipur*

2022 – 2026

Diploma in Computer Science Engineering — 82.17% | *Jamia Polytechnic, Akalkuwa*

2019 – 2022
