

MD TAHSEEN ALAM

Software Development Engineer

+91-9117391745 tassutahsee@gmail.com GitHub LeetCode LinkedIn

Summary

Software Engineer with expertise in backend and full stack development. Experienced in building scalable MERN and Next.js applications, designing RESTful APIs, and deploying production-ready systems. Skilled in improving system efficiency, maintainability, and user experience through clean and modular code.

Technical Skills

Core: JavaScript, TypeScript, Data Structures & Algorithms, OOP, System Design

Backend: Node.js, Express.js, REST APIs, JWT, MongoDB, PostgreSQL

Frontend: React.js, Next.js, Redux, HTML5, Tailwind CSS

DevOps & Tools: Docker, Git, GitHub, CI/CD, AWS, Vercel, Postman, Socket.IO, Cloudinary, OpenRouter

Familiar: Python, C++

Experience

Full Stack Developer Intern

Oct 2025 – Jan 2026

Texura (Remote)

MERN Stack, REST APIs

- Built scalable MERN applications with modular architecture and optimized RESTful APIs, reducing development time by 25% and query response times by 40%.
- Developed a Restaurant SaaS platform for small restaurant owners with authentication, role-based access control, order management, and operational dashboards.
- Contributed to system design discussions, implementing solutions for scalable, robust, and maintainable architecture.

Cloud & DevOps Intern

Aug 2023 – Sep 2023

Learn & Build (Remote)

Docker, Git, CI/CD, AWS

- Containerized backend services using Docker, ensuring consistent deployments across multiple environments.
- Implemented Git workflows including branching and pull requests, improving team collaboration and code quality.
- Worked with CI/CD pipelines and AWS services (EC2, S3, Lambda), reducing deployment time by 30%.
- Deployed and monitored applications, applying real-world DevOps and cloud best practices.

Projects

Lexica AI – AI Report Generator

Next.js, TypeScript, OpenRouter

- Built an AI based application converting prompts into structured reports, cutting creation time from hours to minutes.
- Enhanced prompts with tone control and intelligent formatting, improving report quality and user experience.
- Added PDF and DOCX export, making reports easy to share for academic and professional use.
- Deployed a production-ready SaaS on Vercel, ensuring high availability, scalability, and responsiveness.

InnerLight – Mental Wellness Platform

MERN Stack, AI Integration

- Built a full stack platform featuring mood tracking, journaling, and guided self-help modules.
- Integrated an AI assistant providing contextual and personalized wellness responses, simulating a virtual psychiatrist.
- Designed secure APIs using JWT authentication with modular architecture, optimizing maintainability and performance.
- Ensured production readiness with security best practices, optimized API responses, and clean code.

Achievements

- Solved **250+ Data Structures and Algorithms problems** across LeetCode and other platforms, enhancing problem-solving skills.
- **Branch Topper** during Diploma in Computer Science for consistent academic excellence.

Education

B.Tech in Computer Science & Engineering

2022 – 2026

Global Institute of Technology, Jaipur
