

Md Tahseen Alam

Backend Developer | Full Stack Developer

+91-9234493309 tassutahsee@gmail.com — Portfolio — GitHub — LinkedIn — LeetCode

Summary

Full Stack Developer with hands-on experience building MERN and Next.js applications, including multi-tenant platforms with RBAC, real-time features, REST APIs, and AI integration. Strong backend foundation across Node.js, Express.js, MongoDB, PostgreSQL, Redis, and BullMQ, with experience in Docker and AWS. Seeking Backend Developer or Full Stack Developer roles.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, System Design Basics

Backend: Node.js, Express.js, REST APIs, JWT, MongoDB, PostgreSQL, Redis, BullMQ

Frontend: React.js, Next.js, Redux, HTML5, Tailwind CSS

Cloud & DevOps: Docker, Git, GitHub, CI/CD, AWS (EC2, S3, CloudFront), Vercel

Libraries & Tools: Socket.IO, Postman, Cloudinary, OpenRouter

Experience

Full Stack Developer Intern

Oct 2025 – Jan 2026

Texura (Remote)

MERN Stack, REST APIs, JWT, Cloudinary

- Built a full-featured Restaurant Management platform enabling table booking, online ordering, Razorpay payment integration (test mode), and admin menu management with image uploads.
- Implemented JWT-based authentication and role-based access control (RBAC) for 3 user roles: customers, restaurant staff, and administrators.
- Designed and integrated 15+ RESTful API endpoints with MongoDB, ensuring secure, low-latency data flow between frontend and backend.
- Collaborated with senior engineers on system architecture decisions, optimizing database schemas and API response times.
- Delivered a production-ready MVP used internally to pitch the product to stakeholders.

Cloud & DevOps Intern

Aug 2023 – Sep 2023

Learn & Build (Remote)

Docker, Git, CI/CD, AWS

- Containerized backend services with Docker, ensuring consistent, reproducible deployments across development, staging, and production environments.
- Standardized Git branching and pull-request workflows across the team, improving code review turnaround and code quality.
- Built and maintained CI/CD pipelines integrated with AWS (EC2, S3), reducing deployment time by 30%.
- Deployed and monitored applications in production, applying real-world DevOps and cloud best practices.

Projects

EduManage | GitHub

MERN, Socket.IO, OpenRouter AI, JWT, MongoDB

- Architected a multi-tenant school management platform supporting 5 user roles with separate dashboards and logical data isolation across 4 school organizations.
- Implemented JWT authentication and backend RBAC across super admin, school admin, teacher, student, and parent workflows.
- Built modular REST APIs for attendance, examinations, report cards, timetables, homework, user management, and academic workflows using Node.js, Express.js, and MongoDB.
- Integrated Socket.IO for real-time communication and OpenRouter AI for student performance insights, personalized learning suggestions, and an AI tutor.

Lexica AI | GitHub

Next.js, TypeScript, OpenRouter, Tailwind CSS

- Built an AI-powered SaaS platform that generates structured, multi-section reports from user requirements using Next.js, TypeScript, and OpenRouter.
- Designed an AI prompt-enhancement workflow that converts basic user inputs into structured prompts tailored for professional report generation.
- Implemented dynamic report generation with configurable templates, page requirements, tone, formatting, and token-aware generation controls.
- Developed PDF and DOCX export functionality and deployed the application on Vercel with a responsive, modular architecture.

Achievements

- Solved 300+ Data Structures and Algorithms problems across LeetCode and other coding platforms.
- Branch Topper during Diploma in Computer Science for consistent academic performance.

Education

B.Tech in Computer Science & Engineering

Global Institute of Technology, Jaipur

2022 – 2026

Diploma in Computer Science Engineering — 82.17%

Jamia Polytechnic, Akkalkuwa

2019 – 2022
