

MD TAHSEEN ALAM

Full Stack Developer — MERN — Next.js — TypeScript

+91-9117391745 tassutahsee@gmail.com — Portfolio — GitHub — LinkedIn — LeetCode

Summary

Full Stack Developer with hands-on experience building production-style MERN and Next.js applications, including multi-tenant SaaS platforms with role-based access control, real-time features, and AI integration. Solved 300+ DSA problems; comfortable across the stack from REST API design to deployment on AWS and Vercel. Seeking SDE / Full Stack roles where I can ship scalable, well-architected software.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, System Design Basics

Backend: Node.js, Express.js, REST APIs, JWT, MongoDB, PostgreSQL

Frontend: React.js, Next.js, Redux, HTML5, Tailwind CSS

DevOps & Tools: Docker, Git, GitHub, CI/CD, AWS (EC2, S3, Lambda), Vercel, Postman, Socket.IO, Cloudinary, OpenRouter

Experience

Full Stack Developer Intern

Oct 2025 – Jan 2026

Texura (Remote)

MERN Stack, REST APIs, JWT, Cloudinary

- Built a full-featured Restaurant Management platform enabling table booking, online ordering, Razorpay payment integration (test mode), and admin menu management with image uploads.
- Implemented JWT-based authentication and role-based access control (RBAC) for 3 user roles – customers, restaurant staff, and administrators.
- Designed and integrated 15+ RESTful API endpoints with MongoDB, ensuring secure, low-latency data flow between frontend and backend.
- Collaborated with senior engineers on system architecture decisions, optimizing database schemas and API response times.
- Delivered a production-ready MVP used internally to pitch the product to stakeholders.

Cloud & DevOps Intern

Aug 2023 – Sep 2023

Learn & Build (Remote)

Docker, Git, CI/CD, AWS

- Containerized backend services with Docker, ensuring consistent, reproducible deployments across dev, staging, and production environments.
- Standardized Git branching and pull-request workflows across the team, improving code review turnaround and code quality.
- Built and maintained CI/CD pipelines integrated with AWS (EC2, S3, Lambda), reducing deployment time by 30%.
- Deployed and monitored applications in production, applying real-world DevOps and cloud best practices.

Projects

School Management System | GitHub

MERN, Socket.io, OpenRouter AI, JWT, MongoDB

- Architected a multi-tenant School Management Platform supporting 5 user roles with role-based dashboards and complete data isolation across schools.
- Built attendance tracking, examination management, automated report-card generation, timetable scheduling, and homework management modules end-to-end.
- Integrated OpenRouter AI to power personalized performance analytics, learning recommendations, and a 24/7 AI tutor chatbot.
- Implemented real-time updates with Socket.io and secured the platform with JWT authentication and RBAC authorization.
- Validated functionality with 25+ test accounts across 4 simulated school organizations, demonstrating production-ready scalability.

Lexica AI | GitHub

Next.js, TypeScript, OpenRouter, Tailwind CSS

- Built an AI-powered SaaS platform on Next.js and OpenRouter that converts user prompts into structured, multi-section reports.

- Engineered prompt templates with tone customization and intelligent formatting, improving output consistency and quality.
- Added PDF and DOCX export functionality, enabling users to share generated reports seamlessly.
- Deployed on Vercel with a fully responsive interface and a scalable, modular architecture.

InnerLight | GitHub

MERN Stack, AI Integration, JWT

- Built a full-stack mental wellness platform featuring mood tracking, journaling, and guided self-help modules.
- Integrated an AI assistant delivering contextual wellness guidance and personalized conversational support.
- Designed secure, modular APIs with JWT authentication, optimizing for maintainability and performance.
- Followed production-readiness best practices: input validation, optimized API responses, and clean, documented code.

Achievements

- Solved **300+ Data Structures and Algorithms problems** across LeetCode and other platforms.
- **Branch Topper**, Diploma in Computer Science – ranked 1st for consistent academic excellence.

Education

B.Tech in Computer Science & Engineering

2022 – 2026

Global Institute of Technology, Jaipur
